# ABOUT STALLING KOTT KOATINGS

**STALLING KOTT KOATING:** Incorporated in the emirate of Sharjah, U.A.E in 1993, Being the sole agents of the mother company the pioneers in the field of porcelain re-glazing and refinishing. It has successfully completed 23 years of service in this field, moreover we are the first company to be provided with government approval for the porcelain glazes.

Our technicians gained international experiences by the hands of the mother company's engineers and through our assorted works inside the country at hotels, residential complexes, hospitals, factories & others. Of course we are the superior in our performances and got the satisfaction on our clients.

Stalling Kott Koatings from the time established have presented itself with the solutions for the problems faced by its clients from residential, commercial and hospitality industry. An array of major star hotels of U.A.E form our prestigious client base. At Stalling Kott Koatings we truly believe success lays not only in carrying out projects but also in the service rendered after the works.

Most of the refinishers prefer usage of Acid etching materials in the form of liquid, creams and pastes, The above said products have been determined to be extremely hazardous to the users health and the environment. Our materials are the only glazes in the world that have been tested by the International surveillance agencies through their toxicological laboratory(contox). The glazes are found to be both safe and non toxic and do not contain any carcinogens that can cause cancer, so its ideally suited for even for food preparation areas.

# WHAT WE DO

## ❖ Re-Glazing works

- Bathtub Re-Glazing
- Shower Tray
- Jacuzzi
- WC, WC Seat & Cover
- Anti-Slip Application
- Steam Room Repairs
- Washbasin
- Etc.

## ❖ Waterproofing

## ❖ Concrete crack filling

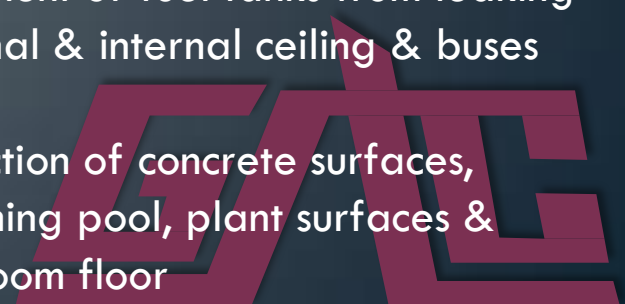

## ❖ Water slider repairing

## ❖ Granitex flooring

## ❖ Supply of cleaning materials

## ❖ Vortex sprayed on liner

- Pick-up truck beds
- Houses surfaces
- Horses loading trucks
- Boats & ships
- Protection of tanks
- Water Sliding
- Gardens & farms equipment
- Water tub
- Horse Stables
- Wharfs
- Concrete floors
- Treatment of fuel tanks from leaking
- External & internal ceiling & buses floors
- Protection of concrete surfaces, swimming pool, plant surfaces & bathroom floor

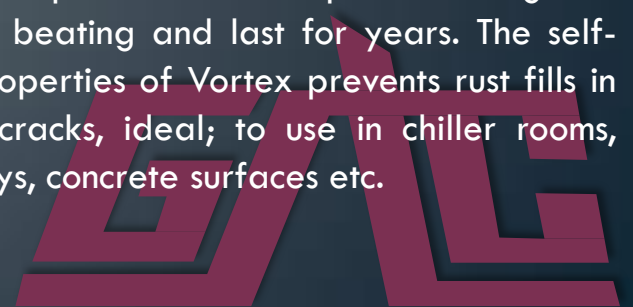

# ABOUT OUR GLAZE'S MATERIALS

## ❖ Kott Koatings materials

Kott Koatings materials developed a process of porcelain re-glazing which can actually re-store a worn bathroom & kitchen fixtures such as bathtubs, sinks, ceramic wall tiles, fiberglass services & counter tops without removing the items. We do all the work on locations without disturb the walls, floors or plumbing fixtures surrounding the same. It means we can give a new life by repairing and resurfacing it with our exclusive glazes which is specially developed for the porcelain-refinishing field.

## ❖ Vortex Sprayed on Liner

It allows applying a super industrial coating up to 1/4" thick to any hard surface such as buses, pickup truck bed and having the coating dry in a matter of seconds. Its able to withstand over 50,000 PSI of impact, the Vortex material is both industrially strong, yet easy to apply using the patented Portable Spray System. Vortex has the only portable spray system that allows complete professional lining or coating of virtually all hard surfaces for a permanent waterproof coating that will take a beating and last for years. The self-bonding properties of Vortex prevents rust fills in gaps and cracks, ideal; to use in chiller rooms, loading bays, concrete surfaces etc.

# ABOUT OUR GLAZE'S MATERIALS

## ❖ Granitex

Granitex sets the standard in surface coatings with a patented blend of urethane and aliphatic urethanes to create a high impact protective surface coating. The Granitex baked-on flooring system are highly UV stable, incredibly stain resistant, and extremely impact resistance. The patented Granitex glazes are heated within the Granitex flooring machine so that when applied to a floor, the glazes provide a penetrating, long lasting, durable surface tough enough for warehouse floor applications as well as residential garage floor resurfacing.

## ❖ Eco-Meric System

The Eco-Meric System is comprised of two coats of water sealing, Elastoflex material. This unique blend of resins allows it to be both environmentally safe yet industrially strong when it comes to sealing off roofs for years of leak free maintenance.

The Top Coat is also a water sealing membrane that is also UV resistant and reflects up to 85% of the harmful sunlight. The final result can reduce cooling coast by up to 31%!

# ABOUT OUR GLAZE'S MATERIALS

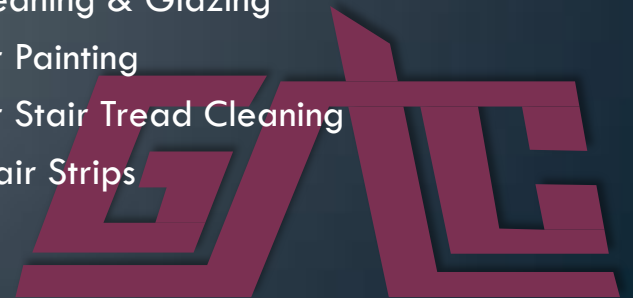

## ❖ Slider & water slide repair, maintenance, and restoration

Specializing in developing and manufacturing it's own proprietary brand, Slide material, of water slide maintenance coatings, cleaners, waxes, polishes and glazes. Our Slide material water slide products have been specifically formulated to restore the "like-new" appearance to dull color faded water slides and aquatic play features. All other water slide restoration companies use off-the-shelf marine gel coat or epoxy paint; both of which have not been formulated to withstand long periods of chlorine-water immersion and surface abrasion from riders. All of our water slide products are environmentally friendly, worker safe, and can be applied by your most trusted local painting contractor, internal maintenance staff, seasonal employees.

## ❖ Slider & water Slide Repair, Renovation and Refurbishment Services

In addition to water slide re-coating, we further offer a variety of water slide repair and restoration services to ensure your water slides operate safely and efficiently throughout the entire season.

- Joint Re-caulking
- Permanent Joint Sealing
- Interior De-scaling, Polishing & Waxing
- Exterior Cleaning & Glazing
- Slide Tower Painting
- Slide Tower Stair Tread Cleaning
- Non-slip Stair Strips

# ABOUT OUR GLAZE'S MATERIALS

## ❖ Steam & Sauna rooms Coating

Using a steam room or a sauna is a beneficial way to relax the muscles, revitalize the skin, improve blood circulation, and ease mental stress. However, due to the extreme heat produced by these facilities, and due to the fact that most spas and saunas are public facilities we specialized a coat which withstands the heat and moisture present inside these facilities.

## ❖ Environmental Clean

Our materials are special environmental materials, and give a shiny smooth surface. It does not contain any poison, acid, toxic or materials that disturb the environment. Our materials are specially made to react with soap, oil, grease, etc. and remove their impurities. Our materials can remove and clean rusty surfaces.

Our materials protect surfaces from bacteria, fungus and other harmful dirt. Its used to clean the bathrooms, kitchens, windows, floors, walls, glass and kitchen tools.

# Advantages of Stalling Kott Koatings Materials

- ❖ Non-Urethane based materials but environment friendly
- ❖ It is not a paint but it is porcelain, well treated to refinish rough surfaces and crack within 12 hours.
- ❖ You can save more than 50% of actual cost you have to pay to other maintenance companies.
- ❖ You may save more than 80% of time.
- ❖ To apply safety trade non slip on bathtub after painting for more safety use. Also could be applied for the floors & staircases for more safety.
